We do very well with Carla Mancini Handbags. They have great quality, reputation and product. We do great with them for trunk shows and special orders. We have sold 40 this year to date.

Jim Collins

What I like about the U.S. Kids product line is that it's very organized in terms of fitting and matching a set to a junior's needs. We use their point of sale racking system so the kids know exactly where to go and keeping it organized is critical to the success. We carry the entire product line and sell through items about 4.5 times per year.

A product that has been flying off our shelves lately has been our picture towel produced by Devant Sport Towels. They've produced a high-resolution image of our stunning 11th hole dyed into the material of the towel. The quality is fantastic and definitely unique. It allows guests to take a piece of the Trump experience and beautiful scenery home with them to share with others.

David Young
PGA Head Professional

We carried a custom Christmas ornament by Kitty Keller Designs last fall that was a big hit and sold out right away. We used the club logo and scenes of the clubhouse and course on the ornament. They were beautiful and since they are handmade, each one is unique. The members loved them.
